Student survey

The Student Welfare Organization of Western Norway is tasked with ensuring a good welfare offering for students through a wide range of services.

Student survey

A key indicator for measuring customer satisfaction with the services Sammen provides is through the student survey. It's important for students to know about Sammen and that our offerings contribute to well-being and mastery in their studies.

Sammen measures how satisfied students are with our services to understand their experiences and evaluations of Sammen. Particularly gratifying is the feedback showing that Sammen is increasingly important for student well-being.

The past four years, since the 2019 survey, have been characterized by a pandemic and challenging economic situations due to inflation and rising interest rates.

Survey results show that Sammen has stood out as present, reliable, and essential.
